QmW
1. (CURRENTLY AMENDED) An apparatus for mounting an adhesive dispenser, comprising:
 - a) a base defined by at least [[one]] four sidewall sidewalls and a top surface, said base including at least one of:
 - i) a storage bay formed through [[said]] a sidewall,
 - ii) a drawer slidably coupled to [[said]] a base, through said sidewall, for movement between an open position wherein said drawer extends outwardly of said sidewall and a closed position wherein said drawer is received within said base,
 - iii) a shelf slidably coupled to said base for movement between an open position wherein said shelf extends outwardly of [[said]] a sidewall and a closed position wherein said shelf is received within said base, and
 - iv) a swing-out plate pivotally coupled to said base, through [[said]] a sidewall, for movement between an open position wherein said plate extends outwardly of said sidewall and a closed position wherein said plate is received within said base; and
 - b) a coupling member proximate attached to said top surface of said base and configured to removably receive and secure the adhesive dispenser ~~to said top surface~~.
